LIST OF REVISIONS

1. Revisions

A. This Illustrated Parts Catalog includes the original issue and the revisions listed in Table 1. To ensure that information in this manual is current, the revisions must be incorporated in the manual as they are issued.

Table 1. Basic Manual - Original Issue-1 October 1982

Revision Number	Date	Revision Number	Date
1	1 October 1983	2	1 March 1984
3	1 November 1984	4	1 May 2008

INTRODUCTION

1. Purpose

A. The purpose of this Illustrated Parts Catalog is to illustrate and identify replacement parts and assemblies necessary for the support of the model covered herein. The information in the catalog is based on data available at the time of publication. Refer to the Maintenance Manual, not this Illustrated Parts Catalog, to determine removal and installation procedures. The airplane operator has the responsibility to use applicable rules to determine the status (or airworthiness) of the airplane.

B. This Illustrated Parts Catalog is divided into chapters which correspond to equivalent chapters in the Maintenance Manual. It is prepared in accordance with the Air Transport Association 2200 Specification Format.

C. The information in this Illustrated Parts Catalog is based on data available at the time of publication. Through service bulletin and publication revisions as well as reissues and temporary revisions of technical publications, this information is updated, supplemented, and automatically amended. Users are urged to keep access to these amendments, which are specifically incorporated within the Illustrated Parts Catalog, through the subscription services of Cessna Propeller Aircraft Customer Services and/or information received from Cessna-authorized service stations. The subscription services are available by phone at 316-517-5800, by fax at 316-517-7271 or 316-942-9006, or by written request to 2121 S. Hoover, Wichita, KS 67209, U.S.

WARNING: All inspection intervals, replacement times limits, overhaul time limits, the method of inspection, life limits, cycle limits, etc., recommended by Cessna are based on the use of new, remanufactured, or overhauled Cessna-approved parts. If parts are designed, manufactured, remanufactured, overhauled, and/or approved by entities other than Cessna, then the data in Cessna's Maintenance and Service manuals and Parts Catalogs are no longer applicable and the purchaser is warned not to rely on such data for non-Cessna parts. All inspection intervals, replacement time limits, overhaul time limits, the method of inspection, life limits, cycle limits, etc., for such non-Cessna parts must be obtained from the manufacturer and/or seller of such non-Cessna parts.

D. Inspection, maintenance, and parts requirements for Supplemental Type Certificate (STC) installations are not included in this catalog. When an STC installation is incorporated on the airplane, those portions of the airplane affected by the installation must be inspected in accordance with the inspection program published by the owner of the STC. Since STC installations may change systems interface, operating characteristics, and component loads or stresses on adjacent structures, Cessna-provided inspection criteria may not be valid for airplanes with STC installations.

2. Effectivity

A. Numbers in the effectivity column indicate that usage of the part is restricted. For example, the numbers 0001 in the Effect From column and 0023 in the Effect To column indicate that the part is used on airplanes 1 thru 23. If the effectivity column that is opposite a first column listing of the figure is blank, the usage is applicable to all models and units covered by this catalog. If this column opposite any indented listing is blank, the usage is applicable to all models and units covered by the next higher assembly or assemblies under which it appears.

NOTE: Information in this Illustrated Parts Catalog is applicable to all U.S. and Foreign Certified airplanes. Information unique to a particular country is identified in the chapter(s) affected.

© Cessna Aircraft Company

3. Aerofiche

A. The Illustrated Parts catalog is designed for aerofiche presentation. To facilitate the use of the catalog for Aerofiche, fiche/frame numbers have been added to the List of Chapters index. The user can find index information to use the aerofiche by referral to the aerofiche headers.

4. Compact Disc (CD-ROM)

A. Publications for this model are available on paper and as electronic media CD-ROM (Compact Disc - Read Only Memory). The paper publications are available as individual publications, such as Maintenance Manual, Illustrated Parts Catalog, etc., while the electronic service publications are grouped together on CD's. One CD includes all the service publications (Maintenance Manual, Illustrated Parts Catalog, Wiring Diagram Manual, Component Maintenance Manual, Nondestructive Testing Manual, Structural Repair Manual, and Illustrated Tools and Equipment List and all the Service Bulletins). These publications are kept up-to-date through routine revisions.

5. Part Number Index

A. Part Numbers in the numerical index are arranged in order according to the extreme left digit, then the next digit to the right, etc. The digits are used in the following sequence: Space, decimal, slash (/), symbols (such as #), letters of the alphabet, then numbers in numerical order.

6. Nomenclature Column

A. The indentation system used in the detailed parts list of this catalog shows the relationship of one part to another. For a given item, the indentation code shows a system, installation or general heading starting in the extreme left position continuing on down into succeeding columns until the end detail is reached. (Refer to Figure 1)

.  .  .  Sub-Sub-Assembly
.  .  .  Attaching Parts for Sub-Sub-Assembly
.  .  .  .  Detailed Parts for Sub-Sub-Assembly
```

Order of Assembly
Figure 1

B. The relationship of the items listed is shown by the degree of indention of each item. For example: the battery installation is listed in the first indenture of the nomenclature column. The Battery Assembly Manifold is the next lower assembly and is therefore listed in the second indenture of nomenclature column. Refer to paragraph A, General System of Assembly Order.

C. If two or more assemblies contain a majority of identical parts or if the assemblies are left or right, the assemblies are together and the next lower assemblies or detail parts are listed as common for both assemblies with the differing parts coded for usage on the correct assembly.

D. Attaching parts are listed immediately beneath the item to be attached and preceding any detail parts of the item. They are listed in the same indention as the item they attach and are preceded by the caption, Attaching Parts. The end of the attaching parts listing is followed by a separating symbol

© Cessna Aircraft Company

"---*---". Component parts which are not included in any assembly but are used in conjunction with, or which attach to certain assemblies, are listed either preceding the first detail or following the last detail of the assembly or installation and in the same indenture as the major assembly or installation.

7. List of Effective Pages (Paper Version)

A. A List of Effective Pages in front of each chapter of the Illustrated Parts Catalog shows all pages within the chapter in sequence, with the most recent revision date for each page. A revised List of Effective Pages is included for every Illustrated Parts Catalog revision.

8. Revision Filing Instructions (Paper Version)

A. Regular Revision
   (1) Refer to the List of Effective Pages of each chapter when you insert a revision.
   (2) With the revision date given for each page in the List of Effective Pages by chapter, you know what pages are changed by the applicable revision. For each applicable page, replace the current page with the revised page.
   (3) Remove and discard current pages in the publication that are shown as "Deleted" in the List of Effective Pages. Each page that is deleted by a revision is not shown in the List of Effective Pages for subsequent revisions of the publication.

B. Temporary Revision
   (1) File pages of a Temporary Revisions in the applicable chapter in accordance with the filing instructions on the first page of the Temporary Revision.
   (2) Remove the Temporary Revisions from the publication only when it is replaced by a revision to the publication or by instructions in a temporary revision that follows and supersedes this temporary revision.

9. Revision Indicators

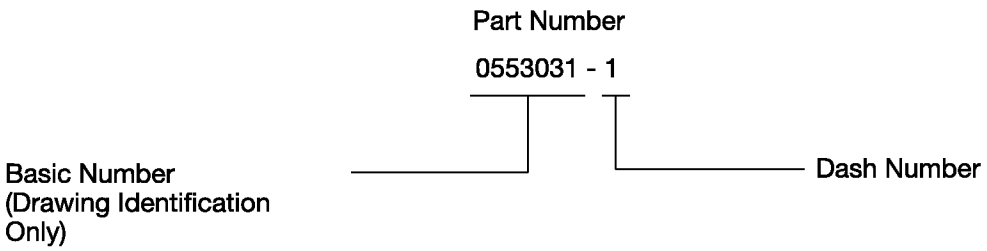
A. Additions, deletions or revisions to the parts list will be identified by the letter "R" in the right margin of the page adjacent to the change, or addition. When technical changes cause unchanged text to appear on a different page/pages, an "R" will be placed in the margin opposite of the affected items.

10. Cessna Part Numbering System

A. The basic number identifies the Cessna drawing only. Each Installation, Assembly or Detail Part is assigned a part number which consists of the drawing number and an appropriate dash number. (Refer to Figure 2)

EXAMPLE:

B1516



Part Number System
Figure 2

© Cessna Aircraft Company

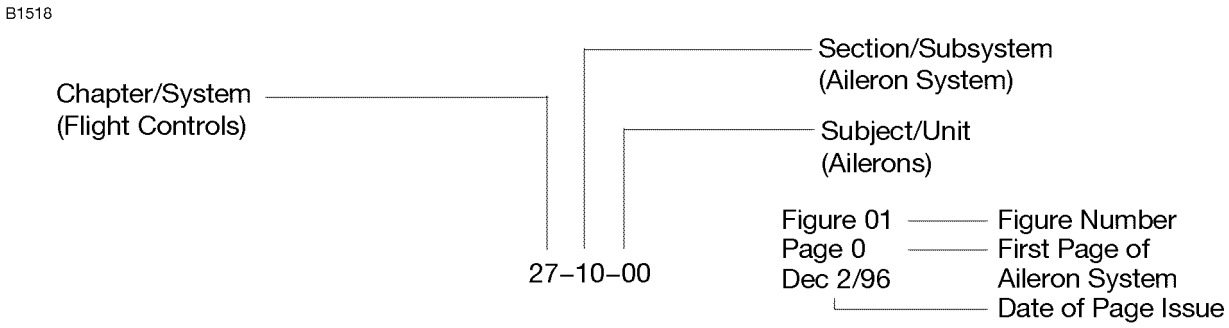
11. Standard Parts

A. Many parts having standard usage have been incorporated into the Cessna Standard System. Parts in this group are designated with the part number prefix "S", "CM" or "C".

B. For standard hardware items such as screws, nuts, clamps, etc., AN, NAS, and MS standard numbers are listed.

12. Page Numbering System

A. The Page Numbering System used in the Illustrated Parts Catalog consists of the Section Number and Page Number separated by a dash with the Change Number at the side. (Refer to Figure 3)



Page Numbering System
Figure 3

13. Part Number Column

A. This column contains the part number used to identify the item.

14. Units per Assembly Column

A. The quantity listed in the Units Per Assembly column is the quantity used per figure. The quantity listed for attaching parts denotes the quantity necessary to attach only one item. The total quantity necessary to attach more than one item may be obtained by multiplying the quantity of attaching parts by the number of items to be attached.

15. Symbols and Part Number Terms

A. When the term, REFER TO, appears in the Nomenclature column and the Units Per Assembly column indicate RF, the figure referred to will be the next higher assembly of the referred item.

B. When the term, DELETED-NOT USED, appears in the Nomenclature column, it signifies that the index number was used but is no longer required. This procedure is used to eliminate re-indexing of all items that following the deleted part.

C. When the letters BKI (Bulk Item), appears in the Nomenclature column and the Units Per Assembly column indicates AR (as required), refer to Cessna Citation Parts Price List for prices and units of measure.

16. Abbreviations Commonly Used

ALT	Alternate	IPC	Illustrated parts catalog
AR	As required	NP	Non-procurable
ASSY	Assembly	RF	Reference

© Cessna Aircraft Company

BKI	Bulk item	SB	Service bulletin
FSO	For spares order	TR	Temporary revision
FIG	Figure	WEU	When exhausted use

17. Serial, Color

A. Be sure to indicate model and serial number of the airplane. Serial number is very important to properly identify parts used on each airplane.

B. When color, upholstery material, Royalite or interior trim are involved, include the complete finish and trim plate number. See the Finish and Trim Plate information for an example of the numbers to be supplied. Part numbers, used to identify these parts, are not complete without the finish and trim numbers.

18. Definition of Text Page Information

A. Refer to Figure 4.
(1) The figure number refers to the corresponding illustration.
(2) The number in the Figure and Item Number column corresponds to the item number on the part in the applicable illustration.
(3) Attaching parts are listed immediately following the part(s) attached. A symbol ---*--- follows the last item of the attaching parts.
(4) Parts with the item number preceded by a dash are not indexed on the illustration.
(5) A supplier's part number is identified in the part number column, The federally-supplied vendor code follows the nomenclature in the nomenclature column.
(6) A number in the Units Per Assembly column indicates the quantity of the part used per next higher assembly or installation.
(7) Numbers in the Effectivity column indicate that usage of the part is restricted. For example, the numbers 0001 0023 indicate that the part is used on airplanes 1 thru 23.
(8) This cross-reference indicates the figure in which the installation of an assembly is broken down to its component parts.
(9) Parts with the quantity "as required" are indicated by "AR" in the Units Per Assembly column.
(10) Alternate part numbers are listed immediately after the part for which they can be substituted. The entry ALT FOR will be shown in the Nomenclature column.
(11) A USED ON or USED WITH note in the nomenclature column indicates the next correct higher assembly of a part when the part is not common to all of the next higher assemblies listed and immediately preceding the part.
(12) Parts used only on a left or right installation or assembly are designated by LH or RH in the Nomenclature column.
(13) "RF" indicates the installation or assembly is listed again in the figure cross-reference in the Nomenclature column. The Units Per Assembly is given in the referenced figure.
(14) The letter "R" in the right margin indicates that text is added or revised in the latest catalog revision.

19. Bulk Items

A. Certain items such as flexible air hose, rubber moldings and channels, windshield sealing strips, etc., are noted in the catalog listings as bulk items. These listings also note the cut lengths of these materials for one installation.

B. When an item is listed as bulk item, it will be supplied to the dealer in the most convenient bulk length or quantity. Reference to the cut length or quantity per installation provided for the most satisfactory disbursement to the customer.

20. Interchangeable Parts

A. When a part of later design is completely interchangeable with the part it replaces, both parts will be serialized and the notation "WEU" (When exhausted use) or "FSO" (for spares order) will be entered following the listing of the earlier design part. "WEU" means that the earlier design part should be used on airplanes to which they apply until the supply of these parts is exhausted, after which time the later design part must be used. This is done to simplify stocking of parts by our distributors and dealers. "FSO" means that the earlier designed part cannot be ordered for this application, order the later design part. The alter part is as good, physically and functionally, as the earlier design part, or better, the difference being the later design part can be used on more than one block of airplane serials.

21. Service Letters and Service Kits

A. A record of Service Letters/Kits prepared for the airplane is listed on the Service Letter/Kit list page.

B. The list of Service Letters/Kit list utilizes four columns to summarize service letter/kit information.
   (1) Service Letter/Kit Number - The service letter/kit number column identifies the service letter/kit by number. Service letters/kits are numbered consecutively.
   (2) Service Letter/Kit date - The service letter/kit date column indicates the date the service letter/kit displays.
   (3) Title - The title column identifies the service letter/kit by nomenclature. It is the same title displayed on page one of the service letter/kit.
   (4) Catalog incorporation date - The catalog incorporation date column will indicate the status of the service letter/kit.
      (a) Date: if date appears in the column, this indicates the service letter/kit information is incorporated into the catalog.
      (b) Not Applicable: if not applicable appears in the column, this indicated the service letter/kit does not affect the catalog.
      (c) Other self - explanatory statements may appear in this column (i.e., replaces, replaced, superseded, etc.).

22. How to Use Catalog If Part Number Is Known (Paper Version)

A. Refer to the following.
   (1) Find the part number in the Part Number Index, refer to figure 5, sheet 1.
   (2) Refer to chapter, section, subject, figure and item number, refer to figure 5, sheet 1.
   (3) Turn to chapter, section, subject and figure, refer to figure 5, sheet 2.
   (4) Locate part on illustration and in part number column by item number, refer to figure 5, sheet 3.

23. How to Use Catalog If Part Number Is Unknown (Paper Version)

A. Refer to the following.
   (1) Turn to Alphabetical Index, refer to figure 6.
   (2) Refer to main group in which part should be listed, refer to figure 6.
   (3) Find the chapter, section, subject and figure number in which the part should be shown, refer to figure 6.
   (4) Turn to the illustration and find the part, refer to figure 5, sheet 3 and refer to corresponding item number in the part number column, refer to figure 5, sheet 2.

SERVICE KITS

- The following is a list of Service Kits applicable to this technical manual. When a Service Kit is initially incorporated into this technical manual, information applicable to the change is referenced in the group assembly parts list, and the Service Kit is listed below.

KIT NUMBER	TITLE	REVISION DATE
SK340-13	Seal and Lubrication Kit	Nov 78
SK414-6	Air Conditioning, Compressor Replacement Kit	May 78
SK414-10	Synchrophaser System Modification	May 78
SK421-62	Air Conditioning Motor Mount	Nov 78
SK421-66	Low Voltage Monitor Installation	May 78
SK421-84	NAV/COM Cooling Blower	Nov 78
SK421-86	Locator Beacon Installation	Nov 78
SK421-76	Locator Beacon Replacement Modification Kit	Nov 78
SK421-93	Main Landing Gear Trunnion & Upper Barrel Assembly Replacement	Feb 79
SK421-87	Electric Windshield Static Discharge Strips	Feb 79
SK421-96	Upper Cabin Door Extender Modification	Jun 79
SK421-100	Electric Windshield Inverter Replacement	Jan 80
SK414-15	Aft Facing Seat Reclining Backstop Mechanism Installation	Nov 80
SK414-16	Propeller Deice	Nov 80
SK414-17	Engine Beam Modification	Jun 81
SK414-40	Exhaust System Seal Replacement Tool Kit	Nov 81
SK421-106	Lower Cabin Door Pneumatic Extender Modification	Nov 81
SK421-105	Main Landing Gear Wheel Well Lower Skin Gusset Installation	Nov 81
SK421-108	Nacelle, Nose and Avionics Door Extender Modification	Oct 82
SK421-109	100 Amp Prestolite Alternator Water Deflector	Oct 82
SK421-113	Autopilot Computer - Amplifier Relocation	Oct 83
SK421-116	Improved Static Discharger Wick installation	Oct 83
SK421-119	Glass Heated Windshield and DC Power Components Installation	Mar 84
SK421-122	Main Gear Actuator Rod End Jamnut Replacement	Mar 84
